SEMI AUTOMATIC CANDLE FILLING PUMP

Semi automatic candle filling pump is a small filling machine that can fill tealight candles, container candles, etc.

Capacity: 10-100pcs/min, speed can be adjusted

CANDLE MOLDING MACHINES

Candle molding machine can produce tea lights, votives, pillars, household candles, taper candles, spiral candles, etc.

Capacity: 3-6times/hr

TEALIGHT PRESSING MACHINES

Tealight pressing machine is used for pressing wax powder into tealight block by rotary pressing system.

Capacity: 30000 pcs/hr

BIRTHDAY CANDLE DIPPING MACHINES

Birthday candle dipping machine is fully automatic and computer controlled. The candle sizes and candle formats are defined in the computer program.

Capacity: 300-600kgs/day, speed can be adjusted

SEMI AUTOMATIC CANDLE FILLING LINE

Semi automatic candle filling machines can automatically complete candle filling process from filling, smoothing surface and cooling liquid wax until finished container candle.

Capacity: 7000pcs/hr, speed can be adjusted

PILLAR CANDLE PRESSING MACHINES

Pillar candle pressing machines are high productivity and flexibility.

Capacity: 600 – 1200 pcs/hr depends on candle size

HOUSEHOLD CANDLE EXTRUDING MACHINES

Household candle extruding machine can directly extrude straight round candle and straight stripe candle by using paraffin wax particle form or powder form.

Capacity: 6000 pcs/hr

WAX POWDER SPRAYING DRUM

Wax powder spray drum is used for spraying liquid paraffin wax into powder form.

Capacity: 500 kg/hr

WAX POWDER SPRAYING CHAMBER

Wax powder spray chamber is used for spraying liquid paraffin wax into powder form.

Capacity: 800 – 850 kg/hr

WICK WAXING MACHINES

Wick waxing machine is a non-stop operating small drawing machine for producing waxed wicks or thin wax strands.

Capacity: 6000 meters/hr

WICK CLAMPING MACHINES

Wick clamping machine is used for cutting waxed wicks and attaching them to metal sustainers.

Capacity: 6000 – 8000 pcs/hr

WICK INSERTING MACHINES

Wick inserting machine is used for gluing wicks with sustainers into glass containers.

Capacity: 2000 pcs/hr

ALUMINIUM TEALIGHT CUP MACHINES

Aluminium tealight cup machine is used for producing aluminium tealight cups.

Capacity: 15000 pcs/hr

WAX MELTING TANK

Wax melting tank is used for melting paraffin wax solid into liquid form.

Capacity: 700 – 1000 kg/hr
